Renk, Ton Değişimi / Shade Variation

Ürünlerimizin tasarımından kaynaklanan desendeki baskılarının değişimlerine göre kutu etiketlerimizde belirttiğimiz renk tonu değişimi aşağıdaki gibi bir sınıflama yapılmaktadır. Almış olduğunuz üründen 1 kutu açıldığında desendeki değişimler ile kutu içinden çıkan karolar arasındaki görünümür ürünlerimizin tasarımına göre farklılık gösterir.

According to the changes in the prints of pattern due to the design of our products, the color tone changes indicated on the labels of the boxes are made as follows. When it is opened 1 box from the product you purchased, changes in the patterns and views between the tiles found in the box are varied with respect to the design of the products.

V1 Tek Düzey Görünüm / Uniform Appearance

Aynı parti üretimden çıkan karolar arasındaki renk ve doku farkı, tüm seramik karolarında olduğu gibi malzemenin doğası gereği gözle görülmeyecek kadar azdır.

Color and texture difference between the tiles from the same lot is very low which cannot be seen as a result of the nature of the material.

V2 Hafif Farklılık / Slight Variation

Birbirine yakın renklerden oluşan karolar arasında, yüzey dokusunda ve baskı desenlerinde açıkça ayırt edilebilir farklar vardır.

There are clear differences in surface texture and printing patterns among the tiles having similar colors.

V3 Önemli Farklılık / Moderate Variation

Tek bir karoda bulunan ana renkler diğer karolarda da mevcuttur. Ancak renk şiddetleri karolar arasında önemli farklılıklar gösterir. Genellikle rustik karolarda kullanılan bir tasarım anlayışıdır.

Main colors in one single tile can be found in other tiles. However color intensity shows differences between tiles. This is generally used in rustic tiles.

V4 Rastgele Farklılık / Substantial Variation

Karodan karoya gelişigüzel renk farklılıkları görülür böylelikle bir karonun renkleri diğerinden tamamen farklı olabilir. Ancak genelde renkler arası bir harmoni vardır. Bu nevi ürünler kutulardan da gelişigüzel çıkacaktır. Genellikle rustik karolarda kullanılan bir tasarım anlayışıdır. Renk ve doku varyasyonu, tesislerimizde kontrol edilebilir. Bir parametre olup, bazı ürünlerde pazar talepleri ve tasarımı gereği ürün geliştirme aşamasında özellikle oluşturulmaktadır.

Color differences can be observed from one tile to another. Thus, color of one tile can be different from another one. However, a harmony is observed between colors. These kinds of products can be found in the boxes in a random order. This is a design approach which is generally used in rustic tiles. Color and texture variation can be controlled in our facilities. This is a parameter, and it is developed in the stage of product development as a requirement of market demands and design.
